Please check to make sure the following items are included with the main unit in the carton:

- (1) Operating Instructions
- (2) Remote Control Unit (RC-176)
- (3) Batteries R6P (AA)
- (4) AC Power Cord

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK) NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to the user.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS POLARIZED PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

SAFETY INSTRUCTIONS

NOTE:

1. Mantenga siempre encendido el interruptor de alimentación (POWER) en la unidad principal.

2. Encienda y apague el equipo desde la unidad de control remoto.

3. Unplug the power cord when you do not plan to use the unit for a long period of time.

CAUTION:

1. Only the MUTTER/STANDBY LED is lit and this means that the power is turned off from the remote control unit. Turn the power on from the remote control unit.

HINWEIS:

1. Lassen Sie den Hutschalter (POWER) am Hauptgerät ständig eingeschaltet.

2. Schalten Sie den Strom mit dem Fernbedienungsschalter ab – nicht als Trennen Sie den Netzstecker vom Netz ab, wenn Sie das Gerät aus.

WAARSCHUWING:

1. Zoer alh voort dat de stoombeschakelaar (POWER) van net-houdt staan in de geopende stand staat.

2. Slach de stroom af uit mb y de afstandsbediening.

3. Neem niet u vanheue u dekt he tlaet gedurende een lange periode de geopende stand staat.

WAARSCHUWING:

1. Als enige de MUTE/STANDBY LED lampen (stand-by toestand) betrekken dit de spanning in uitgangsschakelaar met de afstandsbediening.

OBSERVAÇÃO:

1. Lât altijd stroomstaan (POWER) på hundrederne var åslagen.

2. Koppla loss nätetaket om apparaten inte ska användas utan längd tid.

WARNING:

1. Om man MUTE/STANDBY-apparaten lyser strömförbinder strömkontakten från strömkontakten.

NOTA:

1. Mantenga el interruptor de Corriente (POWER) en el dispositivo principal encendido.

2. Apague el dispositivo a través de la función de control remoto.

DIRECTIONS:

1. Desconecte el dispositivo de la fuente de alimentación.

REMARQUE:

1. Assurez que le bouton d'alimentation (POWER) sur l'unité principale soit toujours dans la position active.

AVERTISSEMENT:

1. Tenez le bouton MUTE/STANDBY en rouge (éteinte) et la tension de la ligne de télécommande.

NOTA:

1. Mantenga el interruptor de Corriente (POWER) en el dispositivo principal encendido.

ATENCIÓN:

1. Asegúrese de que el interruptor de corriente (POWER) en la parte principal esté encendido.

ADVERTENCIA:

1. Mantenga el interruptor de Corriente (POWER) en la parte principal encendido.

PRECAUCIONES:

1. Mantenga el interruptor de Corriente (POWER) en la parte principal encendido.

NOTA:

1. Mantenga el interruptor de Corriente (POWER) en la parte principal encendido.

ATTENTION:

1. Assurez que le bouton MUTE/STANDBY vert et la tension de la ligne de télécommande est coupée depuis la télécommande.

NOTA:

1. Mantenga el interruptor de Corriente (POWER) en la parte principal encendido.

AVERTIMENTO:

1. Mantenha o interruptor de Corrente (POWER) na unidade principal ligado.

NOTA:

1. Mantenha o interruptor de Corrente (POWER) na unidade principal ligado.

ATENÇÃO:

1. Mantenha o interruptor de Corrente (POWER) na unidade principal ligado.

PRECAUÇÕES:

1. Mantenha o interruptor de Corrente (POWER) na unidade principal ligado.

NOTA:

1. Mantenha o interruptor de Corrente (POWER) na unidade principal ligado.

PRECAUCIONES PARA LA INSTALACIÓN:

1. Para realizar la instalación, debe haber una distancia mínima de 10 cm entre el aparato y los demás dispositivos (paredes, estanterías, etc.).

SICHERHEITSMASNAHMEN BEI EINBAU:

1. Lassen Sie die Antennenleitung nicht zwischen den Oberspannungsleitungen verlaufen.

PRAECAUCHEN D'INSTALLATION:

1. Faire des précautions pour débrancher l'appareil lorsque vous le déplacez ou lorsque vous le transportez.

PRAECAUCHEN DE INSTALAÇÃO:

1. Para deslocar o aparelho, desligar pelo menos 10 cm de espaço entre o topo da parede e os lados das unidades e a altura das outras componentes.

NOTE:

1. Always keep the POWER switch on the main unit turned on.

2. Turn the power on and off from the remote control unit.

3. Unplug the power cord when you do not plan to use the unit for a long period of time.

CAUTION:

1. Only the MUTTER/STANDBY LED is lit and this means that the power is turned off from the remote control unit. Turn the power on from the remote control unit.

3 CAUTIONS ON CONNECTIONS

- Do not plug in the power cord until all connections are completed.
- Be sure to connect the left and right channels properly.
- Insert the plugs securely. Incomplete connections can result in noise.
- Use the SWITCHED AC OUT/LETS to plug in audio components. Do not use them for hair dryers or other appliances.

- Note that placing the pin plug cords next to power cords or near power transformer may result in humming or other noise.
- The PHONO input jacks have an extremely high sensitivity, so avoid turning up the volume when pin plug cords are connected. Doing so may result in induction humming (booming) from the speakers. When pin plug cords are not connected, insert the included short-circuit pin plug.

3 OPERATION (Refer to Page 5)

PREPARATION

1. CHECKING CONNECTIONS

- Make sure that all the connections are proper by referring to the rear panel.
- Check the polarity (positive and negative) of connections, and the direction of stereo separation (left/clockwise to right channel terminal, and left/clockwise to left channel terminal).
- Check that the directive of pin cord connection.

COPYING FROM ONE TAPE TO ANOTHER

to copy from TAPE-1/DAT to TAPE-2/MID set the REC OUT SELECTOR switch ⑨ to "TAPE-1 ▲".

NOTE:

Copying is not possible from TAPE-2/MID to TAPE-1/DAT.

NOTE:

- This amplifier has a full memory back-up system. When the power is turned on, INPUT SELECTOR ⑨ are set to the last mode set before the power was turned off.

2. SETTING OF EACH KNOB

- Turn the volume control knob ⑦ counterclockwise to minimum position.
- Set the rotary knob ④ ⑤ ⑥ to center position.
- Set SOUCE DIRECT ⑩ to OFF (■).

After checking the above items, turn on the power; the amplifier is set in the ready mode in a few seconds.

PLAYING A RECORD

- Set the CARTRIDGE selection switch ⑬ "MC (■)" or "MM (■)".
- Set the INPUT SELECTOR switch ⑨ to "PHONO".
- Operate the turntable and play the record.
- Turn the volume ⑦ and tone controls ④ ⑤ ⑥ to yield an appropriate volume and sound quality.

PLAYBACK OF CD PLAYER

- Set the INPUT SELECTOR switch ⑨ to "CD".
- Operate the CD player.
- Turn the volume ⑦ and tone controls ④ ⑤ ⑥ to yield an appropriate volume and sound quality.

RECEPTION OF RADIO PROGRAMS

- Set the INPUT SELECTOR switch ⑨ to "TUNER".
- Operate the tuner to receive a radio program.
- Turn the volume ⑦ and tone controls ④ ⑤ ⑥ to yield an appropriate volume and sound quality.

CONNECTIONS OF AUDIO EQUIPMENT TO AUX TERMINALS

- Set the INPUT SELECTOR switch ⑨ to "DVD/AUX" position.
- Operate the Audio Equipment Systems.
- Turn the volume ⑦ and tone controls ④ ⑤ ⑥ to yield an appropriate volume and sound quality.

PLAYBACK WITH TAPE DECK

- Set the INPUT SELECTOR switch ⑨ to "TAPE-1/DAT" or "TAPE-2/MID".
- Operate the Tape Deck.
- Turn the volume ⑦ and tone controls ④ ⑤ ⑥ to yield an appropriate volume and sound quality.

RECORDING WITH TAPE DECK

- Set the REC OUT SELECTOR switch ⑧ to the program source you wish to record.
- Start the playback of the program source.
- Start recording with the component connected to "TAPE-1/DAT" or "TAPE-2/MID".
 - In the PMA-2000R, the REC OUT signal and the speaker (headphones) signal are output via separate circuits so that knobs and switches related to the tone and volume have no effect whatsoever on the sound that is recorded. Also, since the recording function is selected by the REC OUT SELECTOR switch ⑧, the recording source can be played through the speakers (or headphones) even during recording.

1 DESIGNATIONS AND FUNCTIONS OF PANEL CONTROLS (Refer to Page 5)

① POWER Switch

When the power switch is turned ON (■), the MUTE / STANDBY LED (1) lights.

When the power switch is turned ON, power is supplied to the unit. It takes a few seconds after the power is turned on for the unit to warm up. This is due to the built-in muting circuit that eliminates noise during the on/off operation.

② REMOTE SENSOR (Remote Control Sensor)

This sensor receives the infrared light transmitted from the wireless remote control unit. For remote control, point the wireless remote control unit towards the sensor.

③ PHONES (Headphone Jack)

This jack is used to plug in the headphones. (The SPEAKER output is turned off when the headphones are plugged in.)

To prevent hearing loss, do not raise the volume level excessively when using headphones.

④ BASS Control

This knob is used to control the bass quality of the sound. When the knob is set at the center position, the frequency characteristics are flattened in the range below 1000 Hz. The bass is emphasized as the knob is moved off center to the right (↑), and reduced as it is moved to the left (↓).

⑤ TREBLE (Treble Control)

This knob is used to control the treble quality of the sound. When the knob is set at the center position, the frequency characteristics are flattened in the range above 1000 Hz. The treble is emphasized as the knob is moved off center to the right (↑), and reduced as it is moved to the left (↓).

⑥ BALANCE (Balance Control)

This knob is used to adjust the balance between the left and right channels. When it's set to the center position, the amplitude of the amplifier is equal on both sides. If there is a difference in the left and right channel output volumes for a cartridge, move the knob to the left and the right to adjust it. If the volume on the right side is too low, turn the knob to the right (↑). If the volume on the left side is too low, turn the knob to the left (↓). This will achieve an even balance on the left and right sides.

⑦ VOLUME (Volume Control)

This knob controls the overall volume level. Turn the knob to the right (↑) to raise the volume and to the left (↓) to lower it.

⑧ REC OUT SELECTOR (Recording Output Selector)

Use this to select the output source for recording onto a tape deck, etc. You can copy TAPE-1/DAT source to the tape deck connected to the TAPE-2/MND terminals.

- OFF: In this position, the recording output is turned off. For higher quality playback sound, we recommend keeping the selector at this position when not recording.

2 CONNECTIONS

Connecting the speakers

- Speaker impedance
 - When using speaker systems A and B separately, speakers with an impedance of 4 to 16 Ω can be connected.
 - When bi-wiring with bi-wireable speaker systems, speakers with an impedance of 4 to 16 Ω forms can be connected.
 - Note that when using two sets of speaker systems together (A + B), using speakers with an impedance other than between 8 to 16 Ω forms can result in damage.
 - Note that this unit is not equipped with a switch for selecting the speaker system. The A and B speaker output terminals are connected in parallel.
 - The protective circuit may be activated if speakers with other impedances are connected.
 - Be sure to connect the cords between the speaker terminals and speaker systems with the same polarities (+ to +, G to G). If not, the central sound will be weak and the position of the different instruments will not be clear, diminishing the stereo effect.
 - When connecting the speakers, be sure that the core wires of the speaker cords do not stick out from the terminals and touch other terminals, each other or the rear panel.
 - Connecting the speaker cords
 - ① Peel off the sheathing from the end of the cord
 - ② Toss the core wires
 - ③ Turn the speaker terminal counterclockwise to loosen it.
 - ④ Insert the core wires entirely, then turn the terminal clockwise to tighten it.

CAUTION

- Protective Circuit

This set is equipped with high speed protective circuit. This circuit protects the internal circuitry from damage due to large currents flowing when the speaker jacks are not completely connected or when an output is generated by a short circuit. This protective circuit's operation cuts off the output to the speakers. In such a case, be sure to turn the power to the set off and check the connections to the speakers. Then turn the power on again. After waiting for several seconds, the set will operate normally.
- NOTE: NEVER touch the speaker terminals when the power is on. Doing so could result in electric shocks.

12 INPUTS terminals

These are input terminals for CD players, turntables, AM/FM tuners, tape decks or other playback components.

NOTE:

The PHONO input terminals are equipped with a short pin-plug. Remove this plug to connect a record player. Store the removed short pin-plug in a safe place so as not to lose it.

13 TAPE REC (recording output) terminals

These are recording output terminals for connection to tape decks.

14 SPEAKER SYSTEMS terminals

Connect the speaker systems here.

15 AC IN connector

Connect the included AC power cord here.

16 AC OUTLETS

AC outlets are used for connecting amplifier component units, such as tuner, turntable, tape deck, etc.

17 SIGNAL GND (ground) terminal

Connect the turntable's ground wire here.

18 CARRIDGE Selection Switch

- NOTE: This terminal is used to reduce noise when a turntable, etc., is connected. It does not provide complete grounding.
- CARRIDGE (Cartridge Selection Switch)

This switch is set according to the type of player cartridge to be used. Set this switch to MM (■) or MC (▲) according to the type of cartridge used on your turntable.

19 SOURCE DIRECT (Source Direct Switch)

- The controls BASS (1), TREBLE (5) and BALANCE (6) can be used when this switch is in the OFF (■) position.
- When set to the ON (▲) position, the above controls are bypassed and the signals are input directly to the volume control circuit, providing high quality sound.

20 MUTE/STANDBY LED

- This LED flashes while the muting circuit is activated when the power is turned on and when muting is turned on from the remote control unit, and remains lit (without flashing) while the power switch (1) is turned ON (■).

5 TROUBLESHOOTING

Check the following before assuming there is a problem with the set.

1. Are all connections proper?
2. Is the set being operated as described in the operating instructions?
3. Are the speakers and input components being operated properly?

If the set does not seem to be operating properly, check the points listed below. If these points do not apply, the set may be damaged. Turn off the power immediately and contact your store or purchase

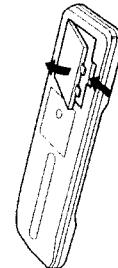

Symptom	Cause	Measures	Page	
MUTE/STANDBY LED does not light and no sound is produced when POWER switch is turned on.	• Power cord is not connected	• Check that the cord is plugged in.	10	
MUTE/STANDBY LED lights but no sound is produced	• Speaker cords not properly connected • INPUT SELECTOR not set to proper position. • VOLUME control turned down.	• Connect securely. • Set to the proper position. • Set to an appropriate level.	9, 10 8, 11 8, 11	
Sound is not produced from one side only	• Speaker cords not properly connected. • Input cords not properly connected. • Left/right balance improperly adjusted.	• Connect securely. • Connect securely. • Adjust the BALANCE control	9, 10 10 8, 11	
Volume level is different when listening to tuner and records	• Tuner and record outputs different	• Adjust the tuner output to the turntable's output (if the tuner is equipped with an output control).	—	
Positions of instruments inverted for stereo sources	• Left and right speakers or input cords inverted	• Check the left/right connections	9, 10	
Boring sound produced when playing records	• Turntable's ground wire not connected. • Input cords not properly connected to PHONO terminals. • Influence from a TV or VCR near the turntable	• Connect securely • Connect securely. • Change the position of installation.	10 10 —	
Howling produced when volume is turned up while playing records.	• Turntable and speaker systems are too close. • Floor is soft and vibrates easily	• Move speaker systems as far away as possible • Use cushions to absorb the vibrations transmitted from the floor to the speakers. If the turntable does not include insulators, use audio insulators, available in stores.	— —	
Sound is distorted	• Stylus pressure is too light. • Dirt on tip of stylus • Defective cartridge	• Apply proper pressure. • Check the tip of the stylus. • Replace the cartridge.	— — —	
Remote control unit	This unit does not operate properly when remote control unit is used	• Batteries dead. • Remote control unit too far from this unit. • Obstacle between this unit and remote control unit. • Different button is being pressed. • \oplus and \ominus ends of battery inserted in reverse	• Replace with new batteries • Move closer • Remove obstacle. • Press the proper button. • Insert batteries properly.	12 12 12 12 13 12

4 REMOTE CONTROL OPERATION

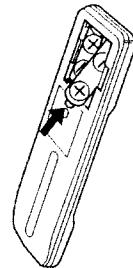

The accessory Remote Control Unit is used to control the amplifier from a convenient distance.

(1) Inserting the Dry Cell Batteries

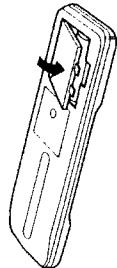

1 Remove the battery cover on the Remote Control Unit:

- 2 Insert two dry cell batteries as shown in the diagram on the battery supply unit.

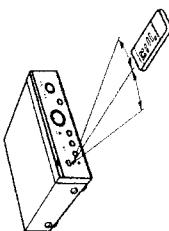

- 3 Replace the battery cover.

(2) Directions for use

- Operate the Remote Control Unit while pointing it towards the Remote Control Sensor on the Amplifier as shown in the diagram on the left.
- The Remote Control Unit can be used at distances up to about 8 meters in a straight line from the amplifier. This distance will decrease if there are obstructions blocking the infra-red light transmission or if the Remote Control Unit is not directed straight at the amplifier.

Note on operation

- Do not press the operating buttons on the Amplifier and the Remote Control Unit at the same time. This will cause misoperation.
- Operation of the Remote Control Unit will become less effective or erratic if the infrared Remote Control Sensor on the Amplifier is exposed to strong light or if there are obstructions between the Remote Control Unit and the Sensor.
- In case you operate a VCR, TV or other components by remote control, do not operate buttons on two different remote control units at the same time. This will cause misoperation.

Besides being able to operate the PMA-2000R Integrated-amplifier with this Remote Control Unit,

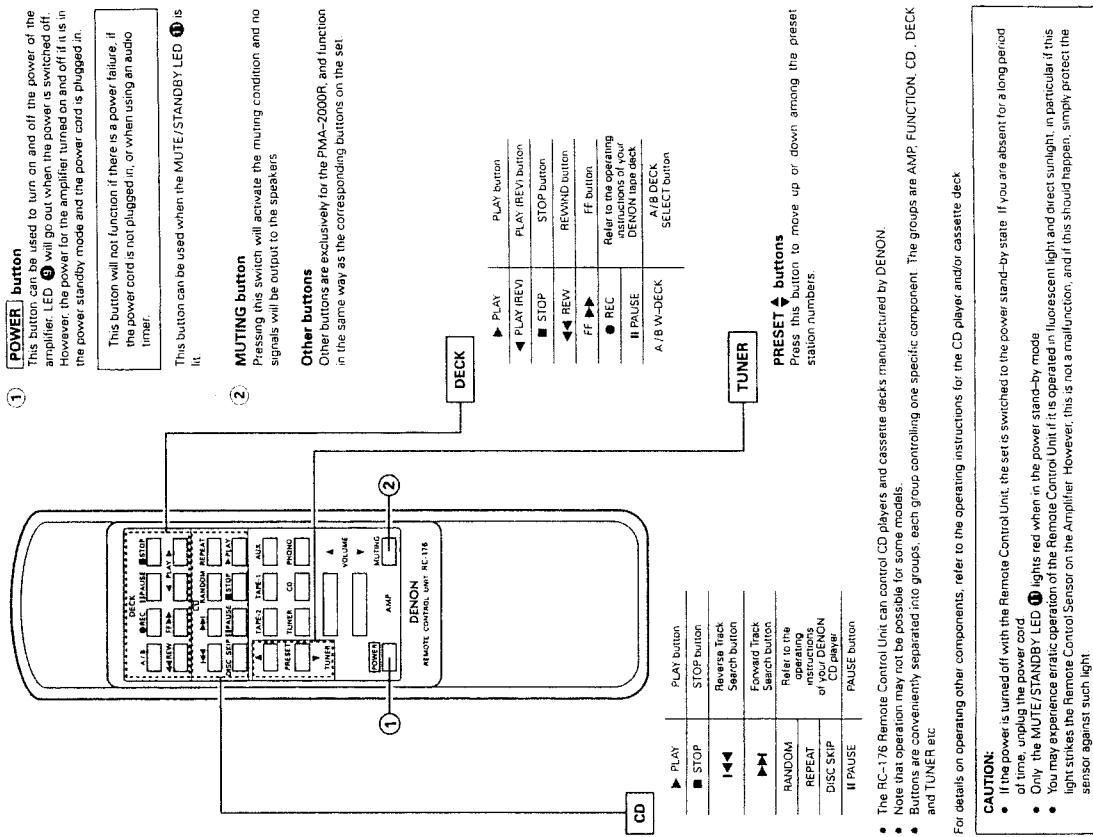

you can also operate a DENON cassette deck and CD player from this handy full-system Remote Control Unit.

Remote control section

FULL-SYSTEM Remote Control Unit

The full-system Remote Control Unit operates all major functions of the Amplifier, such as function switching, volume control. But that's not all! The same control pad can also control the major functions of a DENON CD player and cassette deck and tuner when combined with the PMA-2000R to create a remarkably ergonomic and versatile DENON System with all the quality sound reproduction that the devoted audiophile expects.

Remote Control Unit RC-176 supplied with the PMA-2000R

CAUTION:

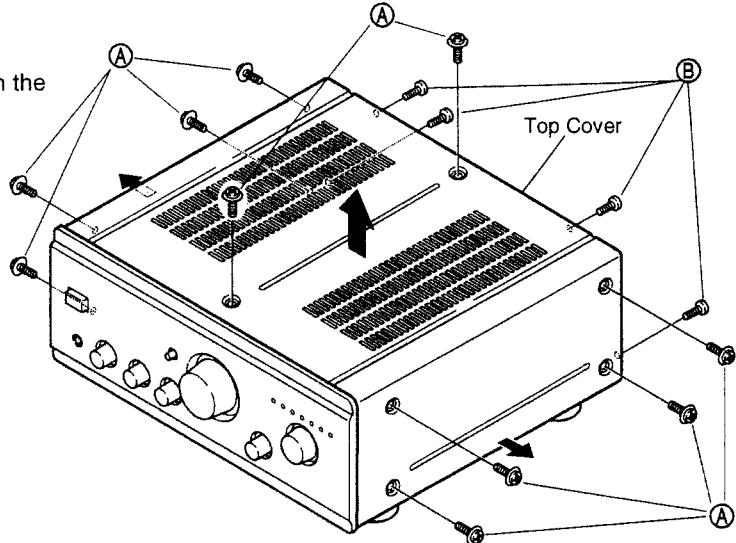

- If the power is turned off with the Remote Control Unit, the set is switched to the power stand-by state. If you are absent for a long period of time, unplug the power cord.
- Only the MUTE(STANDBY) LED ① lights red when in the power stand-by mode.
- You may experience erratic operation of the Remote Control Unit if it is operated in fluorescent light and direct sunlight, in particular if this light strikes the Remote Control Sensor on the Amplifier. However, this is not a malfunction, and if this should happen, simply protect the sensor against such light.

REMOVAL OF EACH SECTION

(Do reverse manner when assembling.)

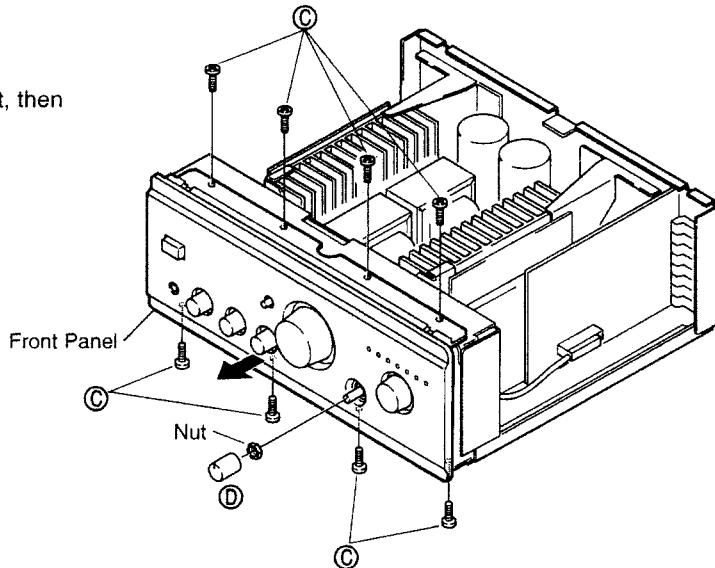

1. Top Cover

Remove 10 screws **A**, 4 screws **B** and detach the Top Cover in the arrow direction.

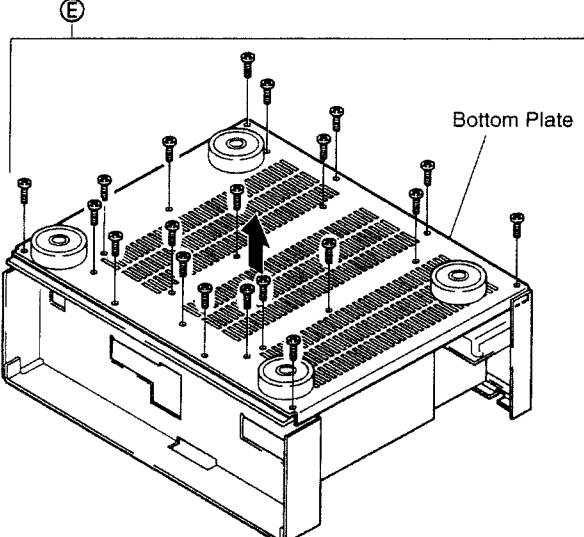

2. Front Panel

- 1) Remove 8 screws **C**.
- 2) Pull out the knob **D** and remove the nut, then detach the panel in the arrow direction.

3. Bottom Plate

Remove 20 screws **E** and detach it in the arrow direction.

METHOD OF ADJUSTMENTS

IDLING CURRENT

- Setup

1. Lay the unit at an ordinary position away from a direct current from an air condition or fan. Do the adjustment at a temperature between 15°C (59°F) and 30°C (86°F).
2. Set controls as follows.

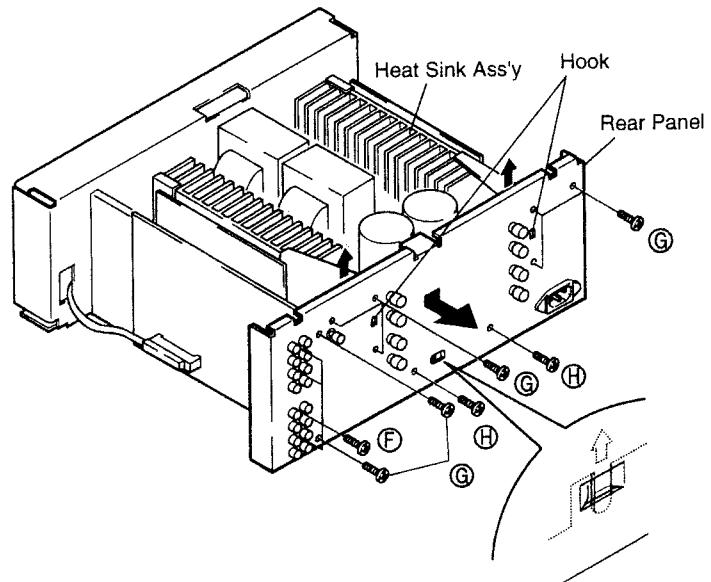

POWER SWITCH	→ OFF (■)
VOLUME CONTROL	→ fully counterclockwise in the minimum position (▲). (Main Volume and Semifixed resistors [VR501, 502]).
SPEAKER Terminals	→ Open: do not connect the speakers, dummy load etc.

- Adjustment

1. Remove top cover. And then connect DC Voltmeter to test points of 1U-2916-1(Lch) and 1U-2916-2(Rch) Power Amp Printing Wiring Board.
2. Connect power cord to AC 230V (within the range 218 ~ 242V permissible) wall outlet, and turn POWER switch "ON" (■). Within 10 seconds turn VR501 (L ch) and VR502 (Rch) clockwise so that the DC Voltmeter reads 8 ± 0.5 mV.
3. Then after 2 minutes warmup adjust VR501 and VR502 so that the DC Voltmeter reads 10 ± 0.5 mV.
4. And after 10 minutes warmup adjust VR501 and VR502 so that the DC Voltmeter reads 10 ± 0.5 mV.

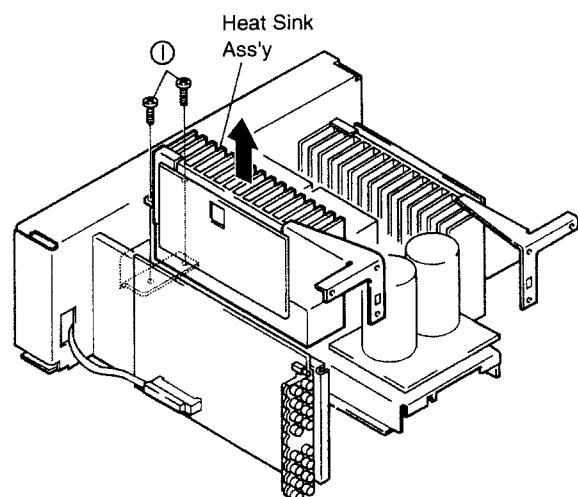

4. Rear Panel

- 1) Remove 4 screws **F**, 8 screws **G** and 2 screws **H**.
- 2) By lifting the right and left Heat Sink Ass'y to release hook in 2 places.
- 3) Detach the Rear Panel in the arrow direction.

5. Heat Sink Ass'y

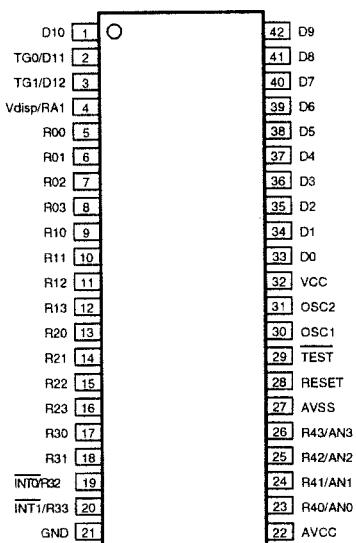

Remove 2 screws **I** and detach the Heat Sink Ass'y in the arrow direction.

NOTE FOR PARTS LIST

- Part indicated with the mark "◎" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film ±5%, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

WARNING:

Parts marked with this symbol have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

NOTES
ALL RESISTANCE VALUES IN OHM. k=1,000 OHM, M=1,000,000 OHM
ALL CAPACITANCE VALUES IN MICRO FARAD. P=MICRO-MICRO FARAD
EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT
CONDITION.

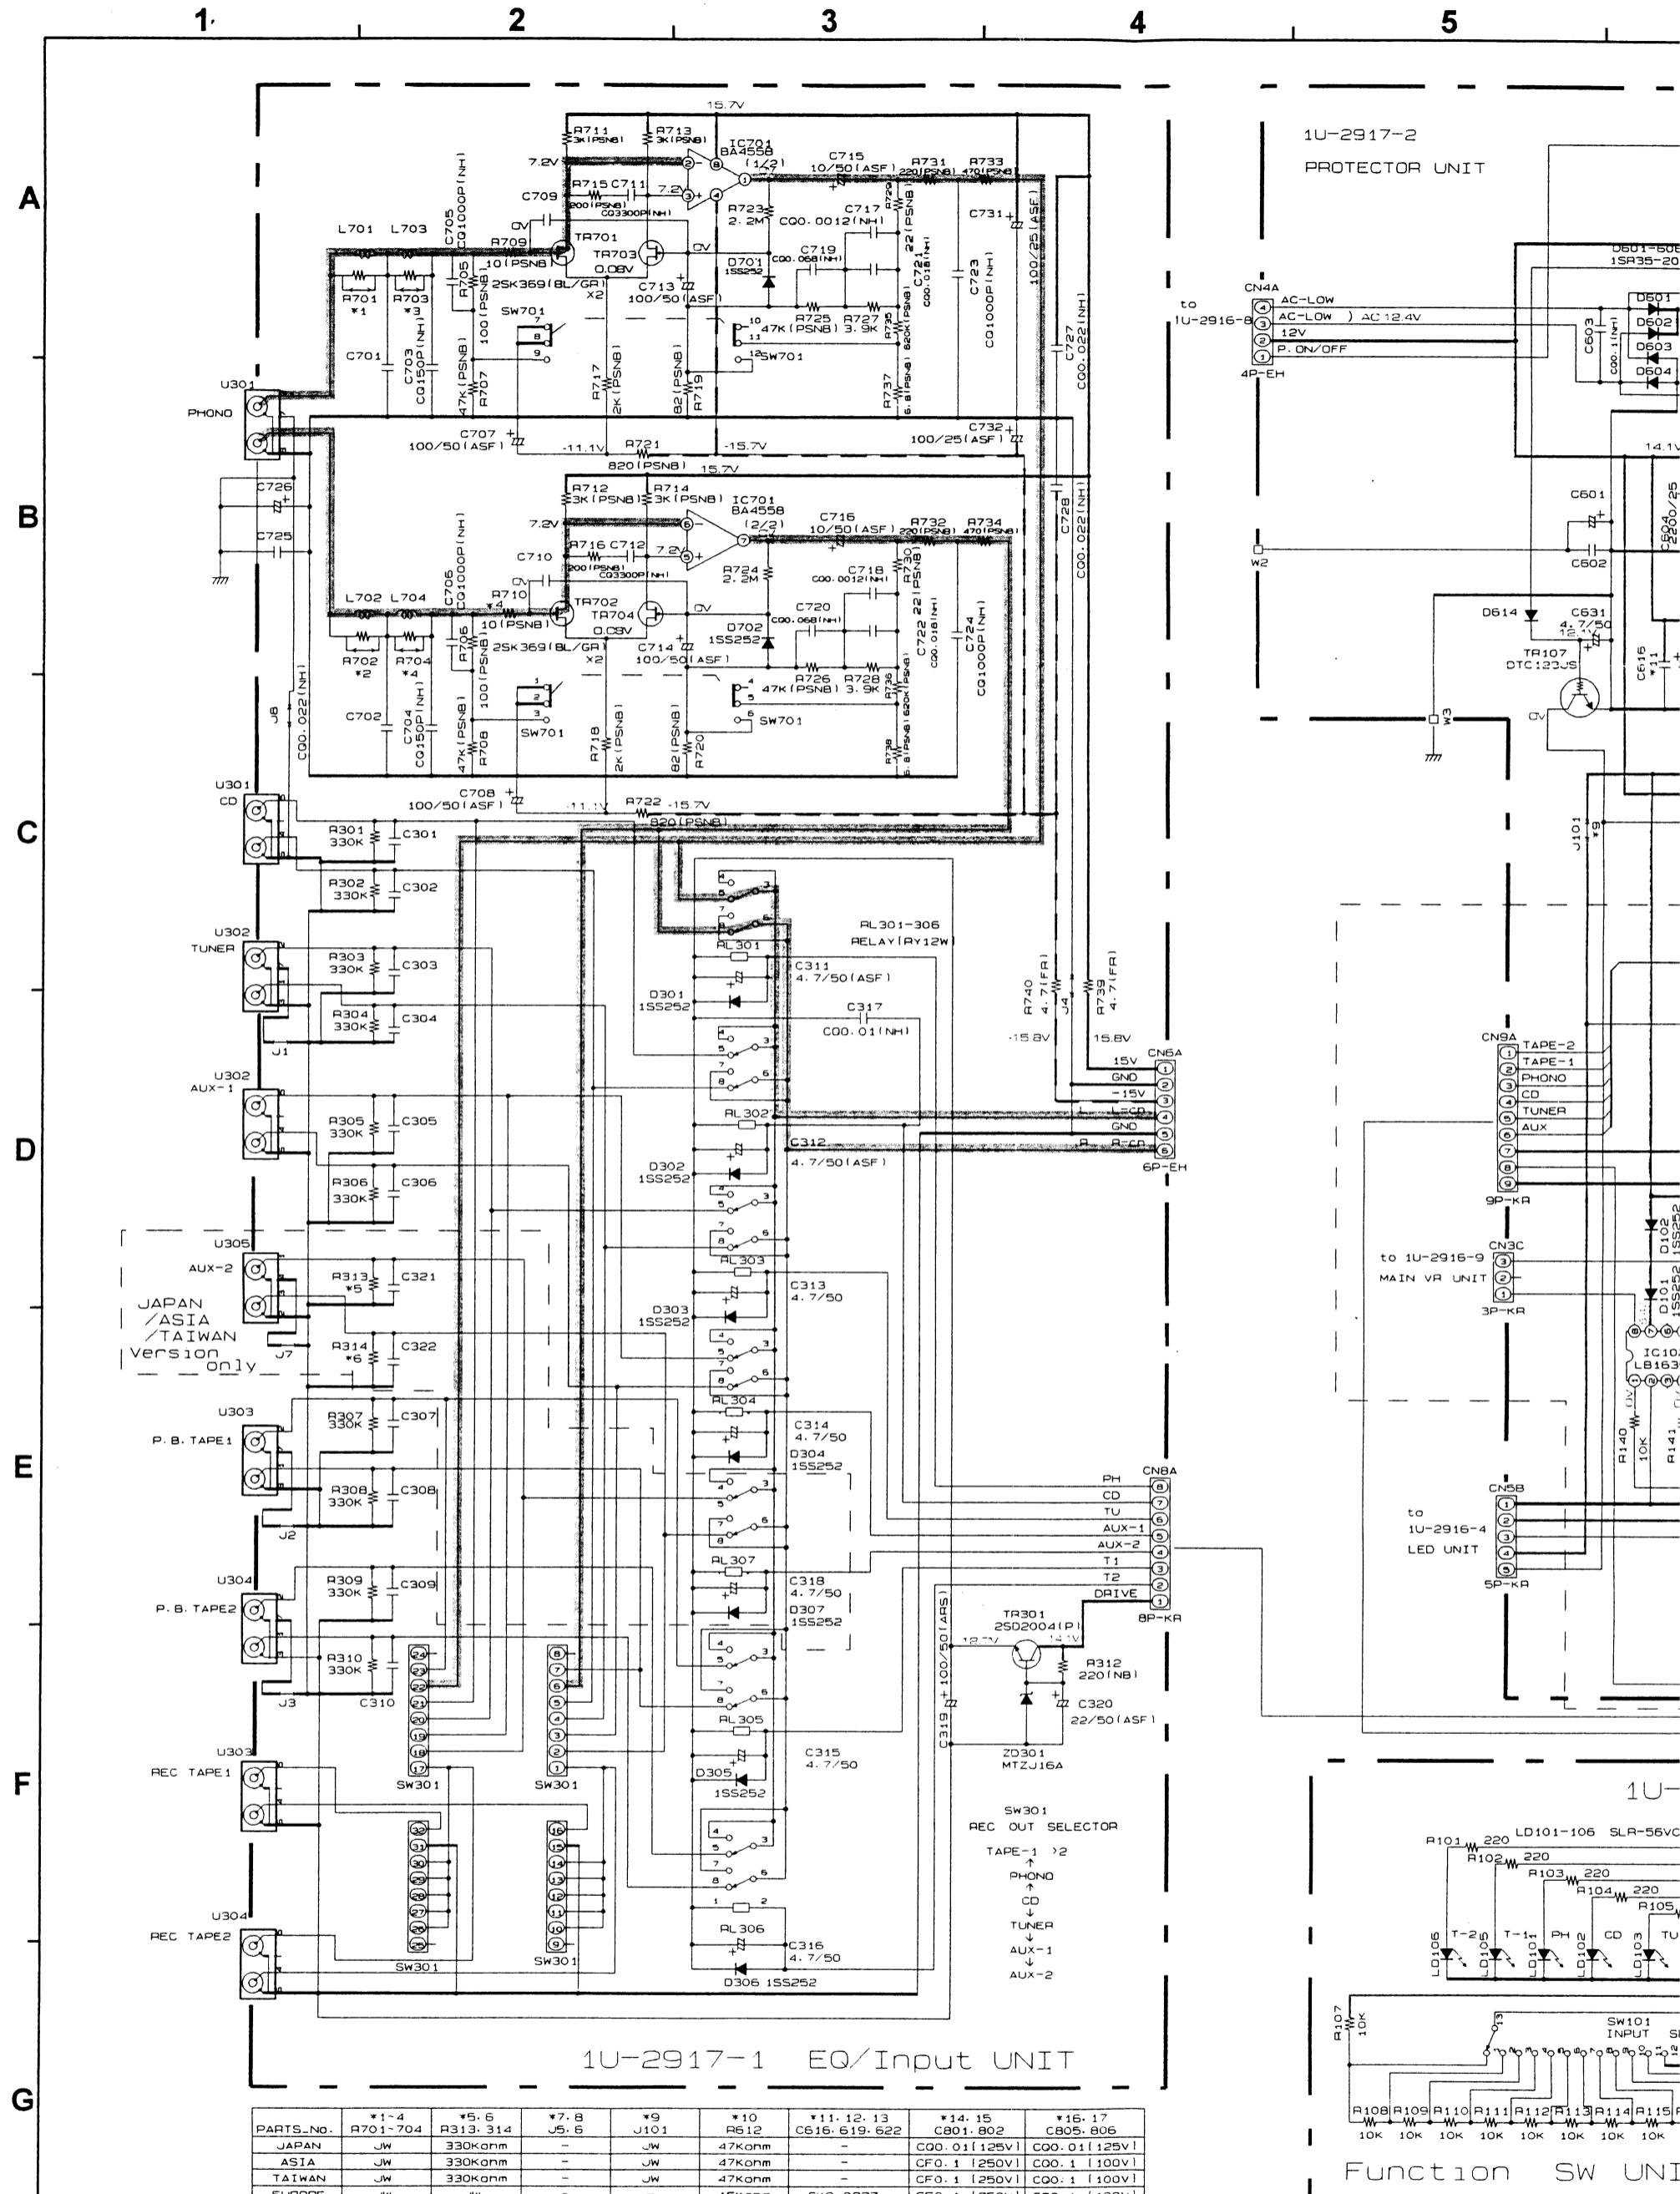

CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.

WARNING:
Parts marked with this symbol   have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

CAUTION:
Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 millamps, or if the resistance from chassis to either side of the power cord is less than 240 kohms, the unit is defective.

WARNING:
DO NOT return the unit to the customer until the problem is located and corrected.
